TECH ART

A Coloring Book of AI Topologies & Circuits

50 Algorithmic Designs

MathRelaxing

THE MATHEMATICS

Welcome to the architectural beauty of Artificial Intelligence.

Hidden behind the algorithms that power modern technology lies a profound geometric elegance. The graphs and topologies found in this book represent the actual structures of Neural Networks, from simple Feedforward layers to complex Radial graphs and Manhattan-routed silicon circuits.

Every design was procedurally generated using mathematical node routing, reflecting the true organized chaos of machine learning models. As you color these interconnected nodes and synaptic pathways, you are interacting with the foundational blueprints of the digital age.
